

# READMISSION

---

Any student who is not enrolled for at least one graduate course for two consecutive semesters (not including summer) will be discontinued as an active graduate student and must request readmission. For readmission, the student will have to apply for readmission and transcripts of any college work taken elsewhere in the interim. The student must also qualify under the admissions policy in the current Graduate Catalog. Readmitted students should note that graduate students are required to complete their program of study within seven years of starting (see Seven-Year Limit on Credits).
