APPLIED PHYSICS, B.A.

Completion of this major prepares a student for a career as a laboratory technician, systems analyst, engineering assistant, research associate, or physics associate. Continued study may include a master's degree in physics, engineering, geology, biology, environmental science, natural science, or science education, among others. It may also include doctorates in medicine, dentistry, or the previously identified fields.

The requirements for admission to this degree track are a minimum cumulative grade point average (CGPA) of 2.5 and MATH 175. Students interested in this track are encouraged to make their selection of major as soon as possible.

| Code | Title | Credits | | |
|--|---|---------|--|--|
| Pre-Requisites PHYS 100 | Draparation for Dhysica | 3 | | |
| CHEM 100 | Preparation for Physics Preparation for General Chemistry | 3 | | |
| Required | Preparation for General Chemistry | 3 | | |
| PHYS 130 | College Physics I (Lecture) | 3 | | |
| PHYS 130 PHYS 1130 | | 3 1 | | |
| PHYS 131 | Physics I Recitation & Laboratory | 3 | | |
| PHYS 131 | Physics II (Lecture) | 3 1 | | |
| PHYS 230 | Physics II (Lecture) | 3 | | |

Courses are part of the General Education program and may be used to simultaneously satisfy a General Education Mode of Inquiry requirement.

Student Learning Outcomes

Upon completion of the Applied Physics BA program, students will be able to:

- Demonstrate knowledge of the factual and theoretical basis of physics including Newton's Laws of motion, conservation laws, E&M and Quantum Mechanics.
- 2. Demonstrate understanding of scientific inquiry and explain how scientific knowledge is discovered and validated.
- 3. Apply quantitative reasoning to describe or explain phenomena in the natural world.
- 4. Demonstrate knowledge of mathematical tools and their applications to understanding physics systems.

- 5. Communicate scientific information based on original research or literature review.
- 6. Demonstrate preparedness to enter the work force or Graduate School.
