## **APPLIED PHYSICS, B.A.**

Completion of this major prepares a student for a career as a laboratory technician, systems analyst, engineering assistant, research associate, or physics associate. Continued study may include a master's degree in physics, engineering, geology, biology, environmental science, natural science, or science education, among others. It may also include doctorates in medicine, dentistry, or the previously identified fields.

The requirements for admission to this degree track are a minimum cumulative grade point average (CGPA) of 2.5 and MATH 175. Students interested in this track are encouraged to make their selection of major as soon as possible.

Pre-Requisites PHYS 100 Preparation for Physics 3 CHEM 100 Preparation for General Chemistry 3 Required PHYS 130 College Physics I (Lecture) 3 PHYS 1130 Physics I Recitation & Laboratory 1 PHYS 131 Physics II (Lecture) 3 PHYS 1131 Physics II Recitation & Laboratory 1 PHYS 230 Physics III (Lecture) 3 PHYS 1230 Physics III Recitation & Laboratory 1 MATH 192 Calculus and Analytic Geometry I 4 MATH 193 Calculus and Analytic Geometry II 4 MATH 292 Calculus & Analytical Geometry III 4 MATH 311 Differential Equations for Engineers 4 CHEM 105 General Chemistry I Lecture 3 CHEM 1105 General Chemistry II Recitation/Laboratory 2 CHEM 106 General Chemistry II Recitation/Laboratory 2 INTD 180 Computer Tools For Science and Mathematics PHYS 321 Theory and Applications of Electricity and Magnetism PHYS 405 Introduction to Quantum Mechanics 3 PHYS 401 Principles and Application of Modern 3

Courses are part of the General Education program and may be used to simultaneously satisfy a General Education Mode of Inquiry requirement.

## **Student Learning Outcomes**

Upon completion of the Applied Physics BA program, students will be able to:

- Demonstrate knowledge of the factual and theoretical basis of physics including Newton's Laws of motion, conservation laws, E&M and Quantum Mechanics.
- 2. Demonstrate understanding of scientific inquiry and explain how scientific knowledge is discovered and validated.
- 3. Apply quantitative reasoning to describe or explain phenomena in the natural world.
- 4. Demonstrate knowledge of mathematical tools and their applications to understanding physics systems.

- 5. Communicate scientific information based on original research or literature review.
- 6. Demonstrate preparedness to enter the work force or Graduate School.
