

ACCOUNTING, B.S.

The Bachelor of Science in Accounting prepares students with the knowledge and skills necessary to record, organize, and understand the financial information of a business.

The program is designed to not only equip students with the necessary accounting knowledge but to teach practical skills. Students' learning experiences are grounded in practice so that they master the application of professional accounting concepts and standards for financial reporting and ethical decision making. Students acquire analytical skills and the necessary software tools to help them succeed as accounting professionals.

Upon graduation, students are prepared for entry-level professional positions in public, private, or government accounting. Within these industries, accountants work in various fields and functions such as auditing, consulting, controllership, budget analysis, information technology, forensic accounting, or financial analysis. Continued study may include a master's and/or doctoral degree in general accounting, taxation, forensic accounting, compliance, controlling, analytics, risk management, law, or general business.

In addition, the program helps students prepare for professional certificates and licenses such as the Certified Public Accountant (CPA), the Certified Management Accountant (CMA), as well as the Governance, Risk, and Compliance Professional (GRCP) certification.

Once matriculated at NJCU, transfer students must complete at least 30 credits at NJCU to satisfy the university's residency requirement. Students must also maintain a GPA of 2.5 or better in courses taken in the School of Business. Students must earn a grade of C or higher in each School of Business course (ACCT, BUSI, ECON, FINC, MGMT, MKTG) used in fulfillment of a graduation requirement.

Code	Title	Credits
Common Core Requirements:		33
MGMT 225	Business Enterprise Applications	3
